

Example:

Round to the hundreds place.

1,564

1. Underline the place you're rounding to.

1,564

2. Draw an arrow to the right.

1,564
↪

3. - If the arrowed number is five or more, round up (the underlined digit goes up by one).
- If the arrowed number is four or less, round down (the underlined digit stays the same).

6
1,564
↪

4. All numbers to the left of the underlined digit stay the same.

1,6
1,564
↪

5. All numbers to the right of the underlined digit turn into zeros.

1,600
1,564
↪

Your final answer is 1,600.
